Douglas Introduces Innovative Contour™ 60 Series

ALEXANDRIA, MN. (August 12, 2014) – Douglas' innovative Contour 60 series provides an economical mid-speed system for tray packing and shrink wrapping bottles, cans, jars, and cartons. The machine is ideal for 600 per minute bottle lines with surge rates up to 720 bpm, capable of producing single lane 12-packs or multi-lane film only 6-packs. The pinless metering system incorporates the new variable path product registration technology to gently group and meter products into the machine. The ergonomic design provides excellent accessibility and visibility into the machine. The 60 series offering includes stand-alone tray packers, shrink wrappers, or fully integrated packaging systems.

About Douglas Machine Inc.

Founded in 1964, Douglas Machine Inc. is recognized as a global leader in automated secondary packaging solutions for paperboard, corrugated, and shrink film. The company specializes in the design and manufacture of cartoners, sleeves, case/tray packers, and shrink-wrap systems. Based in Alexandria, MN, Douglas is an employee-owned company that has installed more than 7,000 machines in 30 countries. For more information, visit www.douglas-machine.com.

Email maryellen.kerber@douglas-machine.com for additional information regarding the Contour 60 series.
